

## Municipal Products > Clearfox® Nature Container

### What is the ClearFox® Nature Container?

A totally non electric containerised wastewater treatment system.

### How does it work?

It uses the same process technology used in the ClearFox® nature domestic wastewater treatment plants to biologically treat sewage to below regulatory standards.

### What is special about the ClearFox® Nature Container?

It is the best solution on the market for areas with unreliable or no electricity. Also suitable for ECO developments that prefer sustainable technologies.

### What are its applications?

Decentralized sewage treatment, worker camps, military camps, hotels, small communities, holiday camps, motorway service stations, villages, etc

### Technical Information

- A pump [optional solar powered] is required to pump wastewater from below ground up to the Nature Container.
- Capable of treating up to 20,000L of wastewater per day in a single container - multiple containers used for larger applications.
- Primary/buffer tank capacity depends on application size – but ranges from 300-500L/person.
